PEIMAR monocrystalline solar panels, produced using a combination of innovative production processes and advanced engineering techniques, provide customers with maximum output and super high performance (over 20% efficiency). This allows fewer panels to be used to generate more energy, ideal if space is restricted or environmental conditions are challenging. We only work with certified suppliers and use the best materials to ensure our panels are extremely robust and resistant to atmospheric agents and accidental shocks. Modern design, using matching black cells and frames and a very long lifespan ensure this monocrystalline are a great option.
